

INFORMATION SERVICES

"Don't ask questions about the future today and you will be left without answers tomorrow."

Unknown

Expand your knowledge!

Are you looking to acquire professional know-how and up-to-the-minute information in the field of climate, energy and environment?

FutureCamp, with its team of experts, draws up studies, research papers, workshops and training sessions in accordance with client needs.

To this end, we provide these services both in-house and for communication to your clients. An in-depth analysis of your business activities will reveal opportunities for new products or business sectors, such as "green" products that are either themselves climate-friendly or indirectly contribute to emissions reduction.

Within the scope of FutureCamp Academy we offer practice-oriented seminars related to all relevant topics in our areas of competence.

Our range of topics

Our services cover a broad spectrum of topics in the fields of climate, energy and environment:

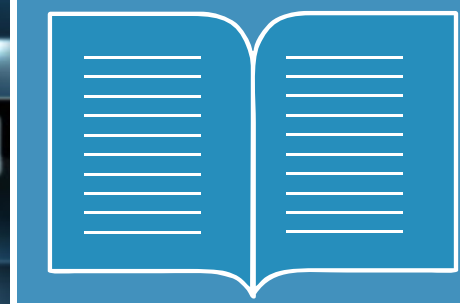

- EU emissions trading
- Price developments and prognoses
- Trading strategies and CO₂ management
- International negotiation processes (COP) and other international developments (Global Climate Governance)
- Implementation of energy management systems
- Energy efficiency
- Carbon footprinting & emissions compensation, CDP
- Life-cycle assessments (LCA) and water management
- Voluntary measures and product developments in the context of a climate strategy
- CSR reporting
- Emissions reduction projects (CDM/JI/VER)

Analysis and knowledge transfer

Creative processes for the development of new business domains and products

Understand potential effects of long-term climate change early on
